simpleTON MK I [v 1.0]

© 2009 Rough Diamond Productions

simpleTON is a stereo filter with drivestage. Use it as a filter, or distortion, or a combination of both.

Controls :

The left knob is a HIGH PASS filter, the right knob is LOW PASS filter, and the middle knob controls DRIVE and MIX. The signal passes through simpleTON like so :

input -> HP -> LP -> DRIVE -> MIX -> output

Filter Frequency [ring] - controls filter cutoff frequency

Resonance [knob] - controls filter resonance

Shape [buttons] - switch between 12 and 24 db/octave slope.

Mode [button] - switch between filter model A & B - B is a more aggressive than A, and introduces phase changes an octave above (hp) or below (lp) the Filter Frequencies.

Drive [red knob] - amount of distortion

Threshold [red-knobbed slider] - 'contour' control of distortion

MIX [ring] - fully left = dry, fully right = wet

To check for updates, click on the "V 1.0" ribbon.

Free version is mono, the full version is stereo
